BESTSLING SPECIFICATIONS

MATERIAL CARE SIZING

Material plays a big part in the comfort of any type of transfer. Bestcare provides many different types of durable mesh, disposable, and full fabric material.

BESTCARE BLUE
POLYESTER

MESH BLUE
FOR BATHING APPLICATIONS
-loosely woven fabric that has a large number of closely spaced holes

HEAVY DUTY GRADE
PERIWINKLE
-polyester
-acrylic coated

SINGLE PATIENT SPECIFIC
NONWOVEN DISPOSABLE
-infection control
-polypropylene
-latex free

SPECIAL WOVEN DISPOSABLE
PERIWINKLE
-polyester
-acrylic coated fabric

CARE & WASHING

Care instructions on the sling label shall have precedence over these instructions should the two be in disagreement. Always follow the care instructions on the sling label. Never wash a Disposable or Single Patient Specific (SPS) sling. Never use bleach to wash or clean a Bestcare sling as the material may be damaged. For reusable fabric slings, hand or machine wash in a gentle cycle with mild soap solution at a maximum temperature of 82°C / 180°F. Rinse thoroughly and air dry. Do not dry clean and always wash slings separately from other items.

CAUTION!

DO NOT USE BLEACH WITH ANY SLING. THE SLING WILL BE DAMAGED AND UNSAFE TO USE!

DO NOT EXCEED WEIGHT CAPACITY.

SIZE & BODY WEIGHT

	SMALL	MEDIUM	LARGE	BARIATRIC
A - diameter around the shoulders (inches)				
UNIVERSAL SPLIT LEG	28-45	37-57	47-67	57-80

**above dimensions are guidelines and may vary by user*

UNIVERSALSLING

Universal slings or “U” slings allow for easier application than full body slings. The universal sling molds around the body easily, eliminating the need to pull the sling under and risk skin injury or discomfort. Available in mesh or full deluxe padded styles. Six point connectivity increases safety and weight distribution for superior comfort. Also available with full head support.

UNIVERSAL SLINGS without head support

BESTSLING

SANI-SLING

Toileting sling made for maximum functionality and patient dignity. Eliminates need for poorly designed commode opening slings. Easy to apply and use, these slings are well padded under the arms and lumbar region for maximum comfort. Bestcare Sani slings also work extremely well on stand assist lifts for patients requiring more lower back support during lifts.

 mesh	SL-PM111	mesh	small	100LB or less

DISPOSABLE SLINGS

Bestcare Single Patient Slings are made from a polypropylene nonwoven layered fabric which allows for a cost effective method of controlling cross contamination and serves as an excellent alternative to woven cloth slings whose cost accumulates over time along with required upkeep and laundering. When more slings are available, staff can assign a sling to each individual Patient. No more sharing slings. No chasing down slings that have gone missing with the laundry. Latex free and tested at 1.5 times the safe working load. SPS slings are intended to be used with a single patient only and cannot be laundered. When soiled, dispose of the sling accordingly.

UNIVERSAL SPS

universal sling without head support

material type	part number	description	size	weight capacity	unit
disposable	SL-UD812	single patient specific	M	600LB	10/cs
	SL-UD813	single patient specific	L	600LB	10/cs

	*1000lb safe work load is ONLY when all loop straps are properly attached				

Sling and Hoist Compatibility

Information for use of interchanging slings with other manufactures hoists

Bestcare LLC (Bestcare) has been designing and distributing replacement slings and medical patient lifts for many years in North America market and Europe.

Throughout the years, slings have changed in style, size, material, and design because of the growing competition in the current market. Many manufactures are very reluctant to accept the interchangeability of slings due to liability factors or for simple marketing self-interest. However, with a thorough written risk assessment done by a competent assessor, using an interchangeable sling in place of a manufacturer's recommended sling can provide the solution to a patient's specific requirements at a lower cost.

Bestcare has been manufacturing slings, patient lifting equipment and transfer products for over 20 years with dedicated focus on quality, safety and workmanship. We strive to make products that are accessible to the people who need it the most through competitive pricing. Bestcare is continuously learning, testing, and adapting to creating new innovative products to fit today's ever changing needs in the healthcare industry as well as maintaining compliance with, international standards and federal regulations.

Bestcare conducts its design and manufacturing based on the ISO guidelines. Both material and design is tested rigorously to comply with the specifications of the **ISO Standard 10535:2006 'hoists for the transfer of disabled persons – Requirements and test methods'**.

Products liability

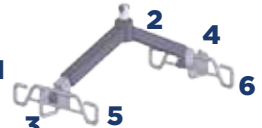

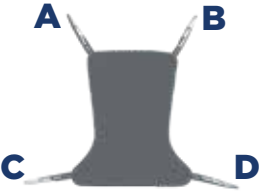

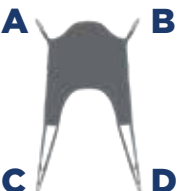

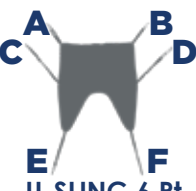

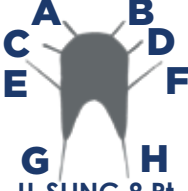

Bestcare LLC insurers provide a combined public and products liability in the amount of \$2 million dollars in respect of injury or damage in the use of slings provided by our company for use of hoists supplied by major companies. They state that:

"They are aware that slings and other equipment, manufactured for Bestcare LLC are designed for hoists and other equipment manufactured by independent companies. This will not prejudice the cover provided and Bestcare LLC's legal liability for damage, accident or injury resulting from manufacturing defects in our products"

Bestcare LLC will provide a copy of our latest insurance certificate upon request.

For your convenience, we have included a reference guide that illustrates how our slings would match up with industry standard spreader bar designs that are currently on the market. Although this chart covers many of the options, nothing will replace your judgment as a care giver. Please use this as a reference but contact our office with any questions you may have about any spreader bar you may be using that is not illustrated on this chart.

At Bestcare we know you have choices about who you will use for your supplier of slings, our goal is to earn your business with safe, affordable and innovative products.

BESTTRANSFER

TRANSFER AND REPOSITIONING

TRANSFER PRODUCTS

TRANSFERSHEET

Continuous nylon loop fabric with treated inner surface to reduce friction. Glides easily in all directions and significantly reduces force required by caregiver to reposition a patient

part number	size	inches	unit
TS 30110	S	28.5 x 27.5	ea
TS 30120	M	42.5 x 31.5	ea
TS 30130	L	53 x 39.5	ea

TRANSFERQUILT

Continuous nylon loop fabric with treated inner surface to reduce friction. Glides easily in all directions and significantly reduces force required by caregiver to reposition a patient. Padded for increased patient comfort with same functionality as the transfer sheets.

part number	size	inches	unit
TS 30210	S	23.5 x 23.5	ea
TS 30220	M	23.5 x 55	ea
TS 30230	L	23.5 x 75	ea

BOOSTERSHEET

Glides easily in up / down direction and significantly reduces force required by caregivers to reposition a patient. Sewn nylon grip handles along both edges assist caregivers.

part number	size	inches	unit
TS 30140	M	29 x 46	ea
TS 30150	L	46 x 46	ea

DISPOSABLESHEETS

Disposable Transfer sheets have many advantages when it comes to laundry costs and is a great alternative in terms of infectious diseases control.

part number	size	inches	unit
TS 30180	standard	28 x 27.5	50/box

HANDBELT

Safe lifting belt with non slip inner surface and easy grip handles. Secure buckle system with quick size adjustments. May be worn by patient or caregiver to assist in standing and pivot functions. Superior comfort and leverage versus traditional gait belts.

part number	size	inches	centimeters	unit
TS 30720	M	5 x 40 (adjusts 29 - 45)	12.7 x 101.6 (adjusts 73.7 - 114.3)	ea
TS30730	L	5 x 40 (adjusts 35 x 55)	12.7 x 101.6 (adjusts 88.9 - 139.3)	ea

HANDIMOVE

Open ended belt with two comfort handles and inner non slip surface. One or two caregivers can apply this by itself or as an aid to sheets/quilts and Handi Lift. Nylon covered with strong poly handles. Inner non slip material covers a foam base.

part number	size	inches	centimeters	unit
TS 30500	standard	9 x 45.5	13 x 115	ea

HANDISLIDE

Single caregiver aid for quick repositioning. May be used alone or in conjunction with other aids. Bottom surface is low friction while top surface is non slip to adhere to clothing. Strong nylon handle with foam interior.

part number	size	inches	centimeters	unit
TS 30300	standard	9 x 45.5	13 x 115	ea

HANDILIFT

Mini stretcher for lifting from the floor, lateral transfer or repositioning in bed. Bottom surface is low friction to allow for easy gliding. Four sturdy comfort grip handles allow for use by two or four caregivers as necessary. Maximum weight capacity 300 Lb.

part number	size	inches	centimeters	unit
TS 30400	standard	16.5 x 39.5	42 x 100	ea

STANDTURN

Two black non slip outer surfaces with slippery inner surfaces. Will easily rotate in all directions when weight applied. User stands in the center and turn in any direction with or without assistance. Designed to be used on beside beds, chairs or outside of cars.

part number	size	inches	centimeters	unit
TS 30820	standard	16	41	ea

SITTURN

Round double sided disk that spins easily in all directions. Slippery inner surfaces make pivot movements a breeze for people with difficulty turning themselves. Ideal for use on chairs, beds and car seats.

part number	size	inches	centimeters	unit
TS 30810	standard	16	41	ea

ONEWAYGLIDES SEATING CUSHION

Unique inner surface of these continuous cushioned tubes allows them to glide in only one direction and resist sliding back in the opposite direction. Once placed in position and correctly oriented, the cushion will only move in one direction. When used properly this will help keep a patient correctly seated instead of sliding forward into a slouch position. Promotes good posture and maximizes comfort. Available with a Velour or Non-slip surface.

NONSLIP

part number	size	inches	centimeters	unit
TS 30610	S	17 x 14.5	43 x 37	ea
TS 30620	M	18 x 18 (best for wheelchairs)	45 x 45	ea
TS 30630	L	31.5 x 23.5	80 x 60	ea

VELOUR

part number	size	inches	centimeters	unit
TS 30640	S	17 x 14.5	43 x 37	ea
TS 30650	M	18 x 18 (best for wheelchairs)	45 x 45	ea
TS 30660	L	31.5 x 23.5	80 x 60	ea
